Built-In Backend Tools

Submission Moderation Tool

Easy to use moderation flow with advanced features and Ai support to auto moderate (Google Vision). Filter, find, and review photos with ease.

Moderation options: Manual, Auto-approve, or Google Vision

Add/Remove/Edit Starter Photos

Easily upload and edit your starter photo library. Starter content can be kept in the mosaic, or removed once real content is submitted.

Download Data & Photos/Videos

Download individual submissions, along with a spreadsheet (csv) of all data collected.

Depending on features of your mosaic, more tools will be available
