# INTRO | Embed to any platform or website

Our interactive mosaics are built to be easily embedded into any platform or website and be fully compatible in desktop, tablet and mobile. For nearly all platforms and websites, it should be as easy as copy and pasting the embed code into the html or platform interface. If there is any issue, please be sure to reach out to us [here](#). You can always test your embeddable mosaic by clicking on the [Test Your Embed Code](#) button in the embed screen on the Explore Page or Interactive & Collaboration Dashboard as shown below.

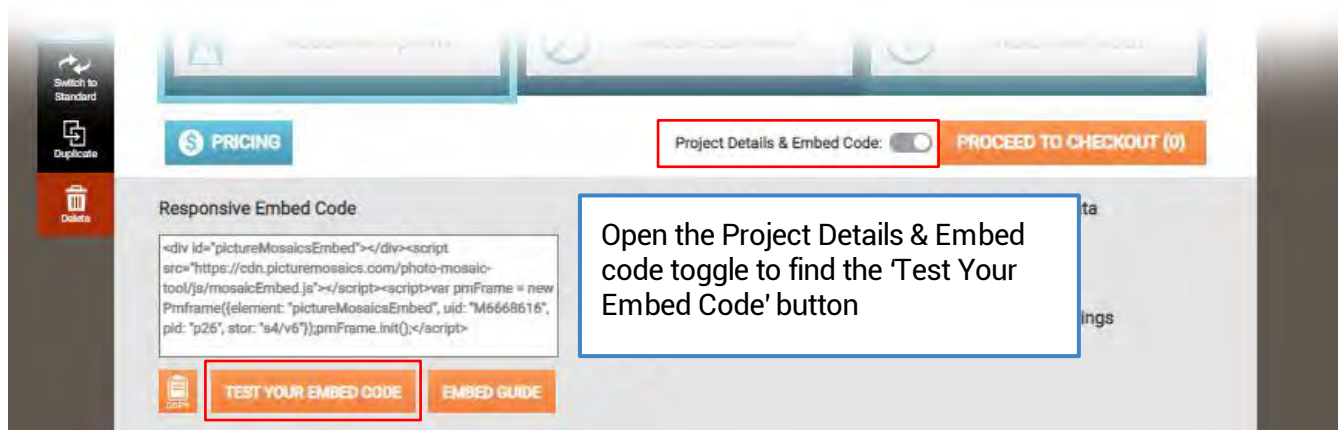

```
1 <!DOCTYPE html>
2 <html>
3 <body>
4
5 <h1>Welcome Mosaic</h1>
6 <p>Help us complete the mosaic by submitting your photo. It's going to be amazing!</p>
7
8 <div id="pictureMosaicsEmbed"></div><script
9   src="https://cdn.picturemosaics.com/photo-mosaic-tool/js/mosaicEmbed.js"></script><script>var pmFrame =
10   new Pmframe({element: "pictureMosaicsEmbed", uid:
11     "M4964514", pid: "p2", stor:
12     "s6/v42"}});pmFrame.init();</script>
13
14 </body>
15 </html>
```

Want to test the embed code on your platform before creating your project? Copy and paste the code below.

```
<div id="pictureMosaicsEmbed"></div><script
src="https://cdn.picturemosaics.com/photo-mosaic-
tool/js/mosaicEmbed.js"></script><script>var pmFrame =
new Pmframe({element: "pictureMosaicsEmbed", uid:
"M6668616", pid: "p26", stor: "s6/v1"});pmFrame.init();</script>
```

## Collaboration & Interactive Dashboard

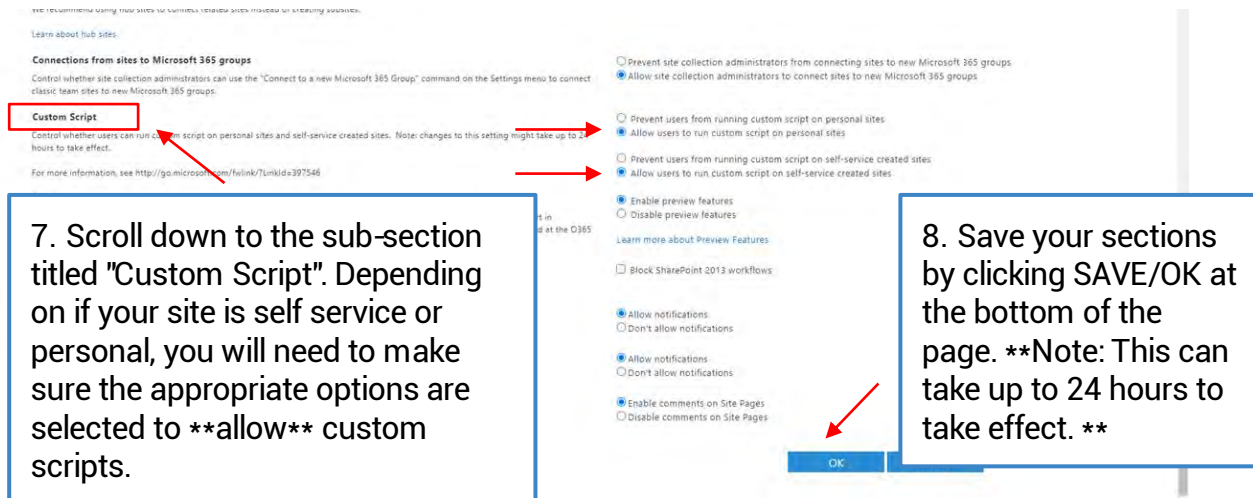

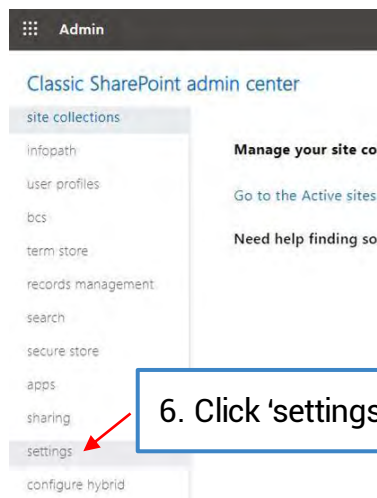

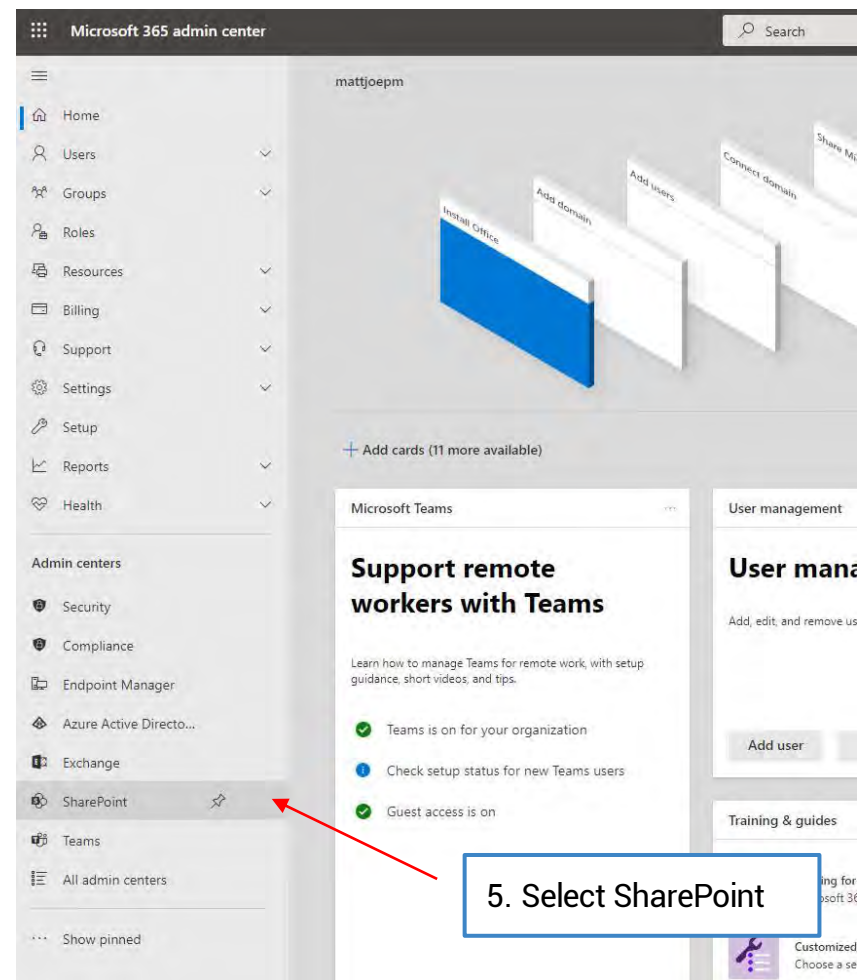

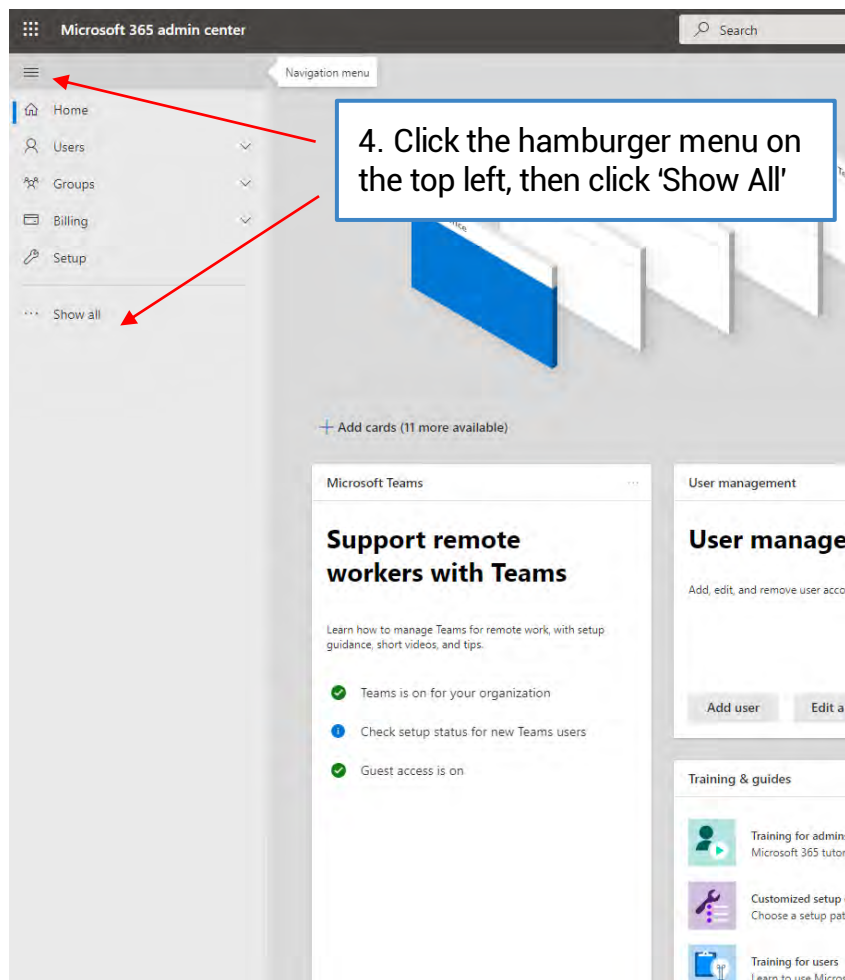

# SHAREPOINT (via Microsoft 365 or Modern)

In order to use the preferred embed code that offers the best experience on your SharePoint site, you will need to allow custom scripts. First off, you will need to ensure you are logged in as an Administrator. If you have issues enabling custom scripts or unable to for or reason or another, you can use an alternate embed code that is slightly less flexible/responsive, but still will allow most functionality. Before reaching out to us [here](#) to obtain the alternative iframe embed code, be sure to try these steps below first:

SharePoint admin center

### Active sites

Use this page to sort and filter sites and manage site settings. [Learn more](#)

+ Create   Export

Site name	URL	Storage used (GB)	Primary admin	Hub	Site type	Created	Last modified	Owner
Communication site	https://mattjoepm.sharepoint.com	0.00	Global Administrator	-	Communication site	3/18/21	12/18/20, 2:38 PM	Global Admin
test_1	.../sites/test_1	0.00	Group owners	-	Team site	3/18/21	3/17/21, 12:41 PM	test_1 Owner

9. [Assuming the site exists] From the Admin Center, click on the site you need to add the embed code to.

EDIT LINKS

Name  
Type a file name for your Web Part Page. The file name appears in headings and links throughout the site.  
Name: .aspx  
☐ Overwrite if file already exists?

Layout  
Select a layout template to arrange Web Parts in zones on the page. Multiple Web Parts can be added to each zone. Specific zones allow Web Parts to be stacked in a horizontal or vertical direction, which is illustrated by differently colored Web Parts. If you do not add a Web Part to a zone, the zone collapses (unless it has a fixed width) and the other zones expand to fill unused space when you browse the Web Part Page.  
Choose a Layout Template:  
Header, Footer, 3 Columns  
Full Page, Vertical  
Header, Left Column, Body  
Header, Right Column, Body  
Header, Footer, 2 Columns, 4 Rows  
Header, Footer, 4 Columns, Top Row  
Left Column, Header, Footer, Top Row, 3 Columns  
Right Column, Header, Footer, Top Row, 3 Columns

Save Location  
Select the document library where you want the Web Part Page to be saved.  
Document Library:

Create Cancel

12. Name the page, choose a layout template, and document library.

13. Click 'Create'

14. Select the button on the newly created page that says 'Add a Web Part'. Depending on your layout, there may be multiple buttons

15. Under 'Categories', select 'Media and Content'.

16. Under 'Parts' select 'Script Editor'

17. Click 'Add'. Your Script Editor will be added to the web part you selected initially.

# WORDPRESS | v4.x

In order to embed the mosaic on your WordPress site, you will need to login as an administrator.

The screenshot shows the WordPress admin interface for editing a page titled "Test Mosaic". The left sidebar contains the WordPress menu with "Pages" selected. The main content area shows the page editor with a "Text" tab selected. Three numbered instructions are overlaid on the interface:

1. Log in and select the page you want to embed the mosaic onto.
2. From the 'text' tab, paste in the embed code where you would like the mosaic to appear on your page.
3. Click preview to see how your mosaic looks on your page.

The page editor shows the following elements:

- Permalink: <https://www.picturemosaics.com/photo-mosaic>
- Buttons: Add Media, Add Gallery, Visual, Text, b, i, link, b-quote, del, ins, img, ul, ol, li, code, more, close tags, contact form, proofread, and a search icon.
- Embed code: 

```
<div id="pictureMosaicsEmbed"></div><script src="https://cdn.picturemosaics.com/photo-mosaic-tool/js/mosaicEmbed.js"></script><script>var pmFrame = new Pmframe({element: "pictureMosaicsEmbed", uid: "M6668616", pid: "p20", stor: "s4/v6"});pmFrame.init();</script>
```
- Publish sidebar: Save Draft, Preview, Status: Draft Edit, Visibility: Public Edit, Move to Trash, and Publish.

# WORDPRESS | v5.x

In order to embed the mosaic on your WordPress site, you will need to login as an administrator.

The screenshot shows the WordPress dashboard interface. At the top, there's a header bar with the WordPress logo, a plus icon in a blue square, and several utility icons. Below this, the main content area displays the title 'Test Mosaic'. To the left, a sidebar menu lists various widgets. A red arrow points from the plus icon in the top header to a text box. Another red arrow points from the 'Custom HTML' widget in the sidebar to another text box. A third red arrow points from the 'Custom HTML' widget to a fourth text box. The 'Custom HTML' widget is highlighted with a red box. The 'WIDGETS' section is also labeled.

1. Log in and select the page you want to embed the mosaic onto.

2. Click the plus icon in the top left to add a new 'block' to your page

3. Scroll down to the WIDGETS section and click 'Custom HTML'. This will add an empty block to your page.

4. Paste the code from Picture Mosaics into the block.

## Test Mosaic

5. After pasting in the embed code, you can click 'Preview' to make sure the code is working properly.

6. Click the Preview button in the top right to preview the entire page in a new window.

In order to embed your mosaic on your Wix site, you will need to login as an administrator.

The screenshot shows the Wix dashboard interface. On the left is a dark sidebar with navigation options: 'Set Up Your Site' (1 step left), 'Dashboard', 'Ascend by Wix', 'Customer Management', 'Marketing & SEO', 'Analytics & Reports', 'Finances', and 'Settings'. The main area displays 'Mysite' with a URL 'https://www.mosaiclab.cc/'. A blue 'Site Actions' button is highlighted with a red arrow. A dropdown menu is open, showing options: 'Edit Site' (highlighted with a red box), 'Get Feedback', 'View Live Site', 'Rename Site', 'Duplicate Site', 'Transfer Site', 'Invite People', 'Move to Trash', and 'Create New Site'. A text box with the instruction '2. Click 'Site Actions' and select 'Edit Site'.' points to the 'Edit Site' option. On the right, there's an 'Analytics' section with a 'Customize' link and a 'Site Sessions' chart showing 10 sessions today and 3 yesterday.

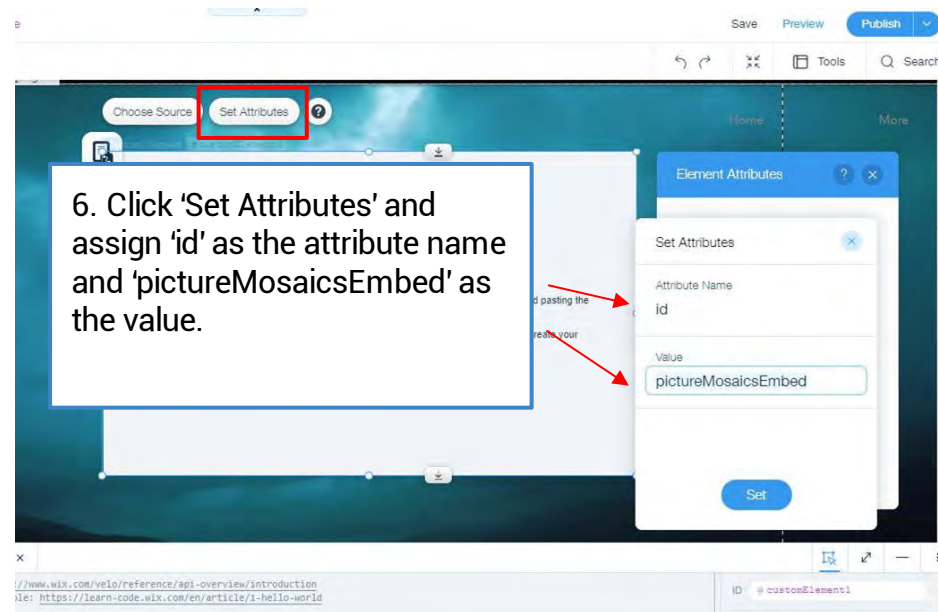

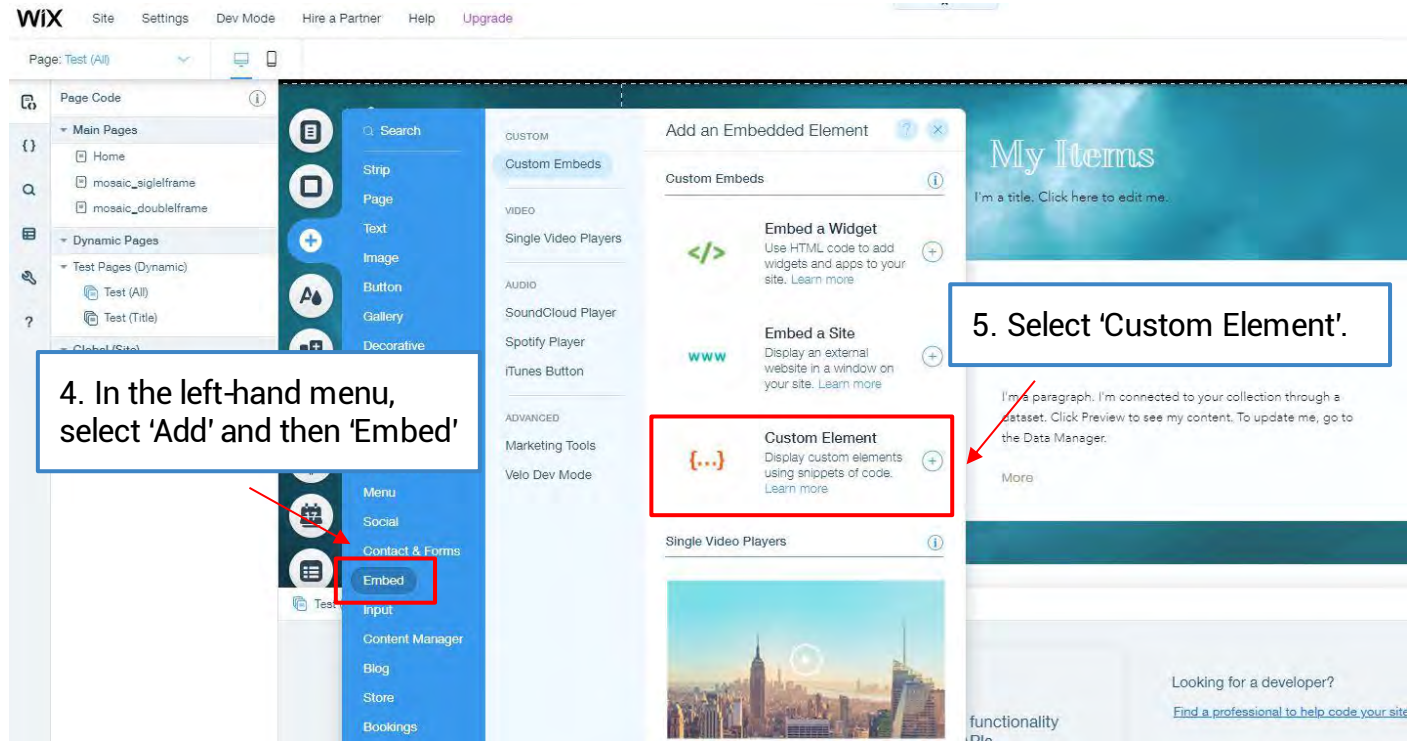

1. Log into your account.

2. Click 'Site Actions' and select 'Edit Site'.

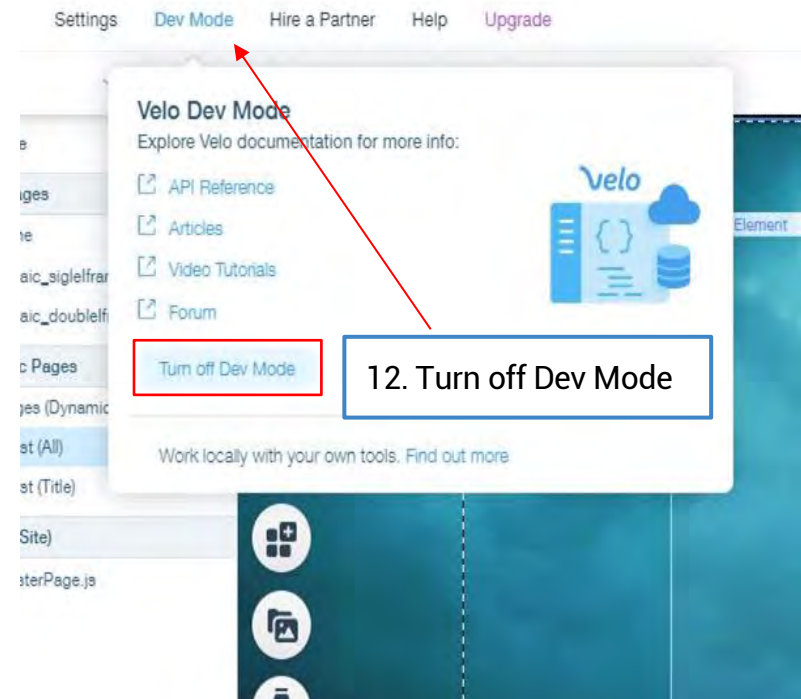

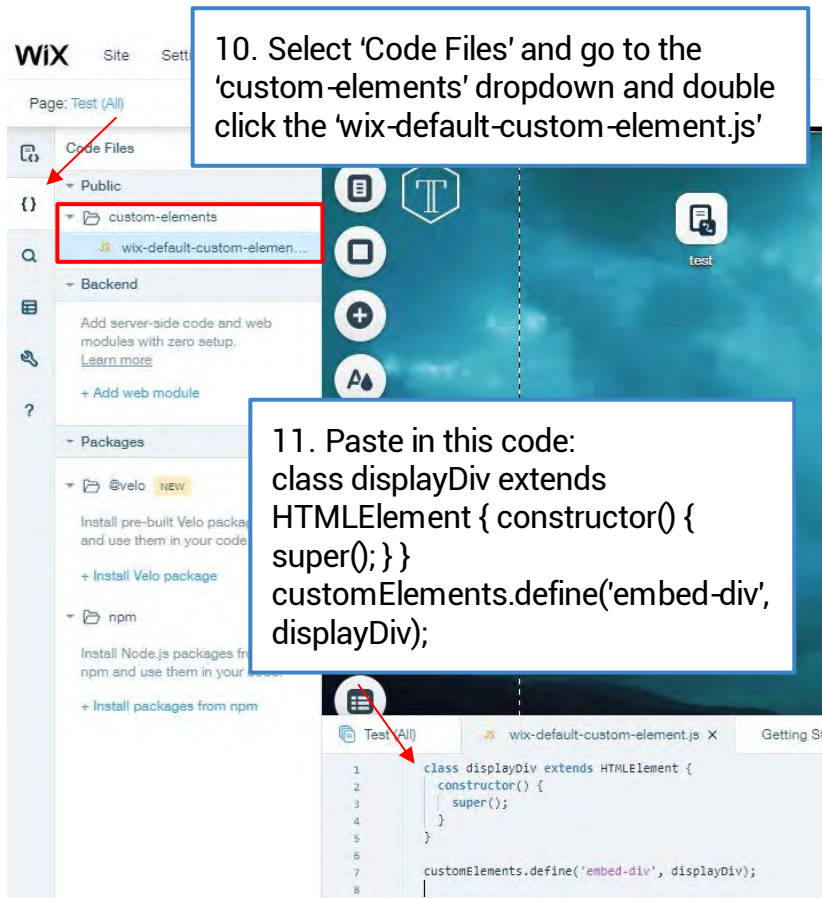

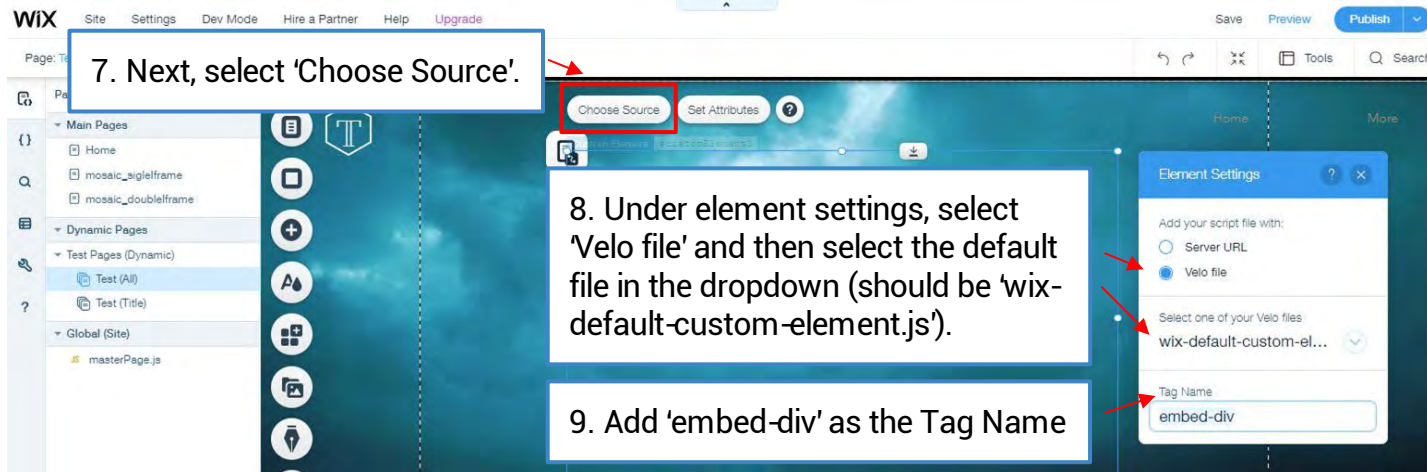

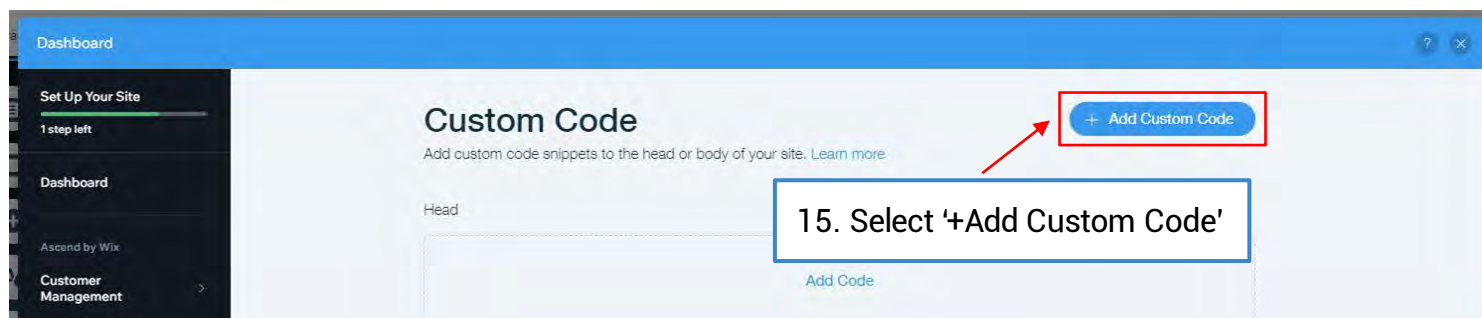

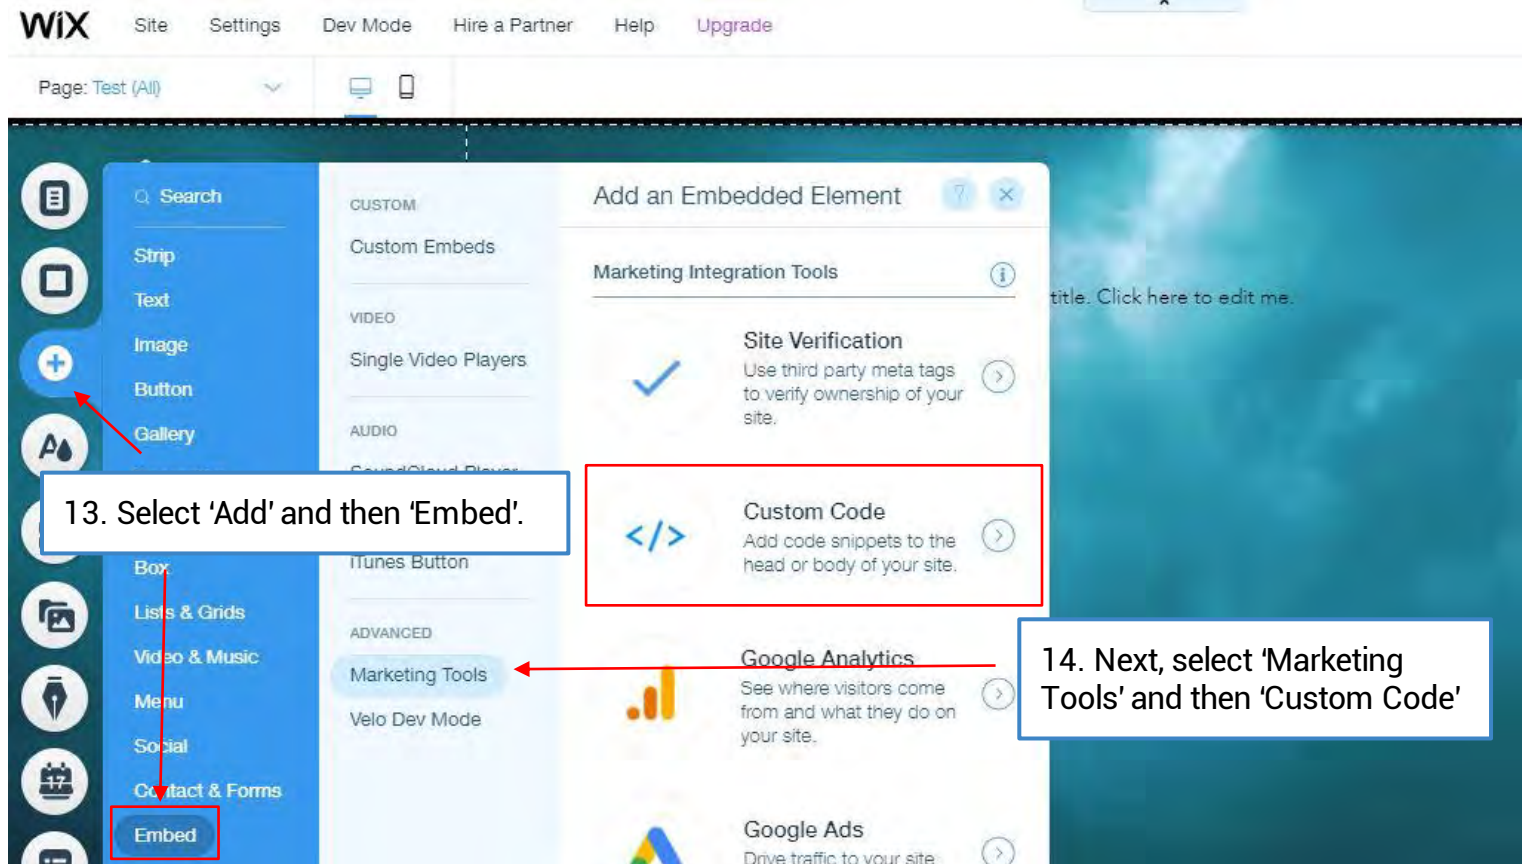

The screenshot shows the Wix dashboard interface. In the top header, the 'Dev Mode' link is highlighted with a red arrow. A modal window titled 'Velo Dev Mode' is open, showing a list of features: 'Add your own JS code', 'Connect Wix business on', 'Use internal & external development tools', and 'Zero-setup with serverless Node.js'. A blue 'Turn on Dev Mode' button is highlighted with a blue box. A text box with the instruction '3. Click 'Dev Mode' in the top header and then select 'Turn on Dev Mode'.' points to the 'Turn on Dev Mode' button. The background shows a 'Page: Test (All)' view with a teal background and a 'T' icon.

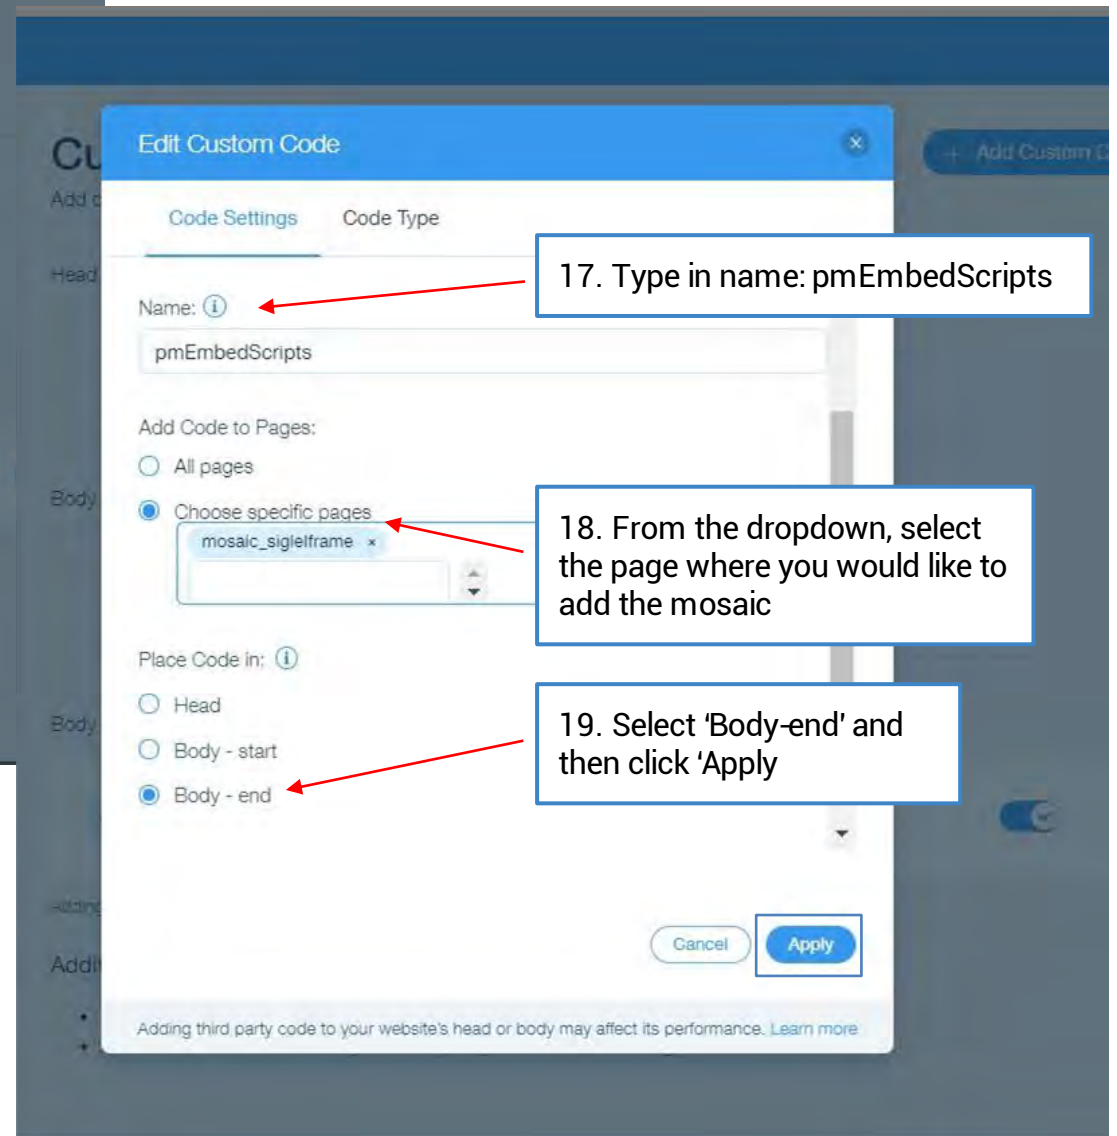

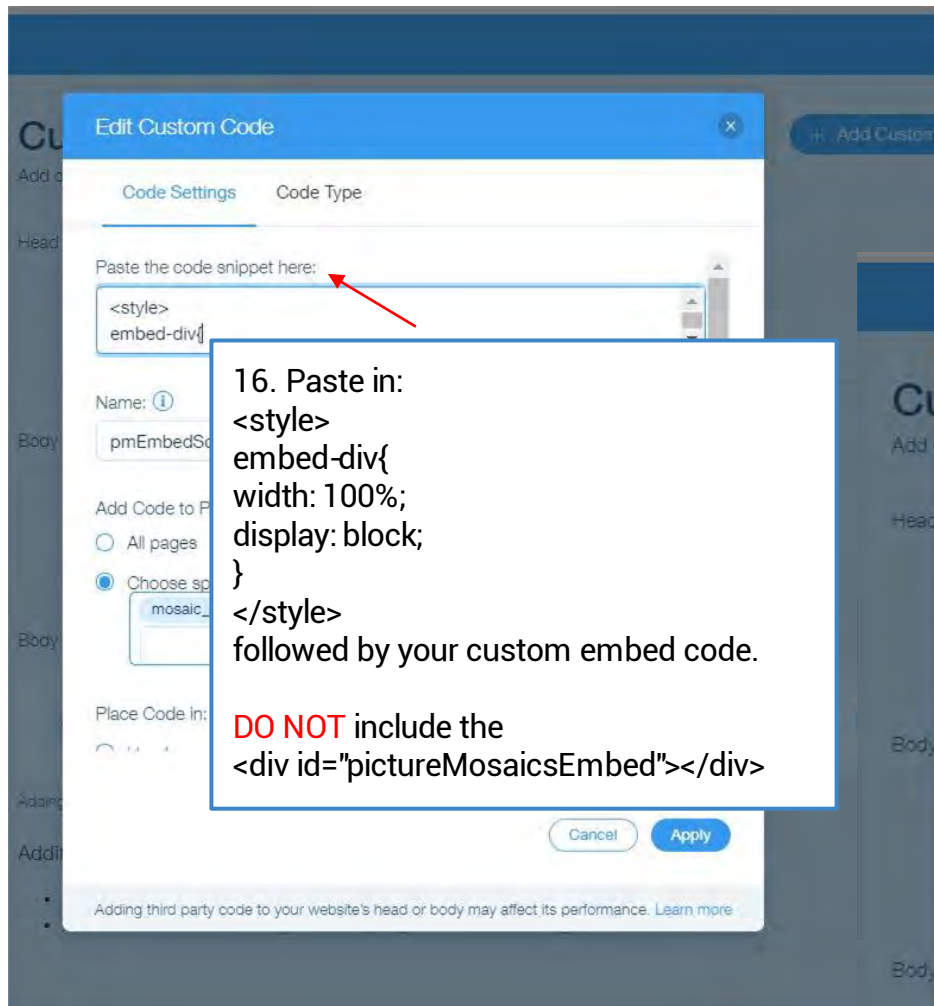

3. Click 'Dev Mode' in the top header and then select 'Turn on Dev Mode'.

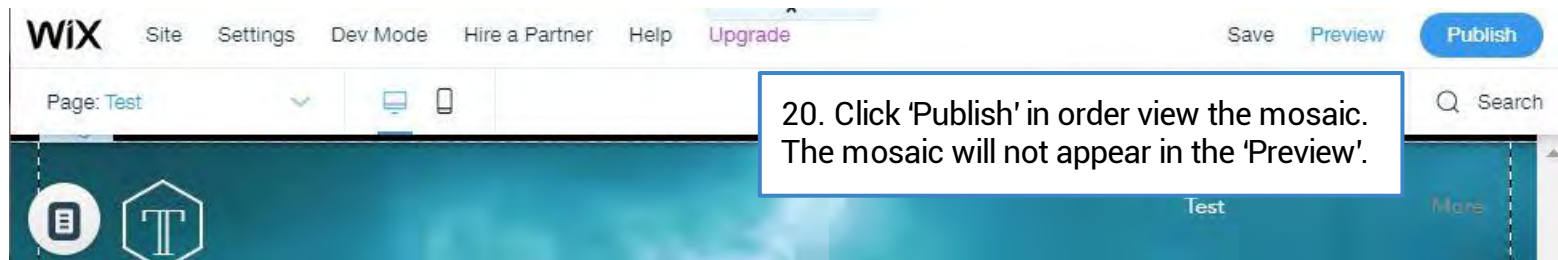

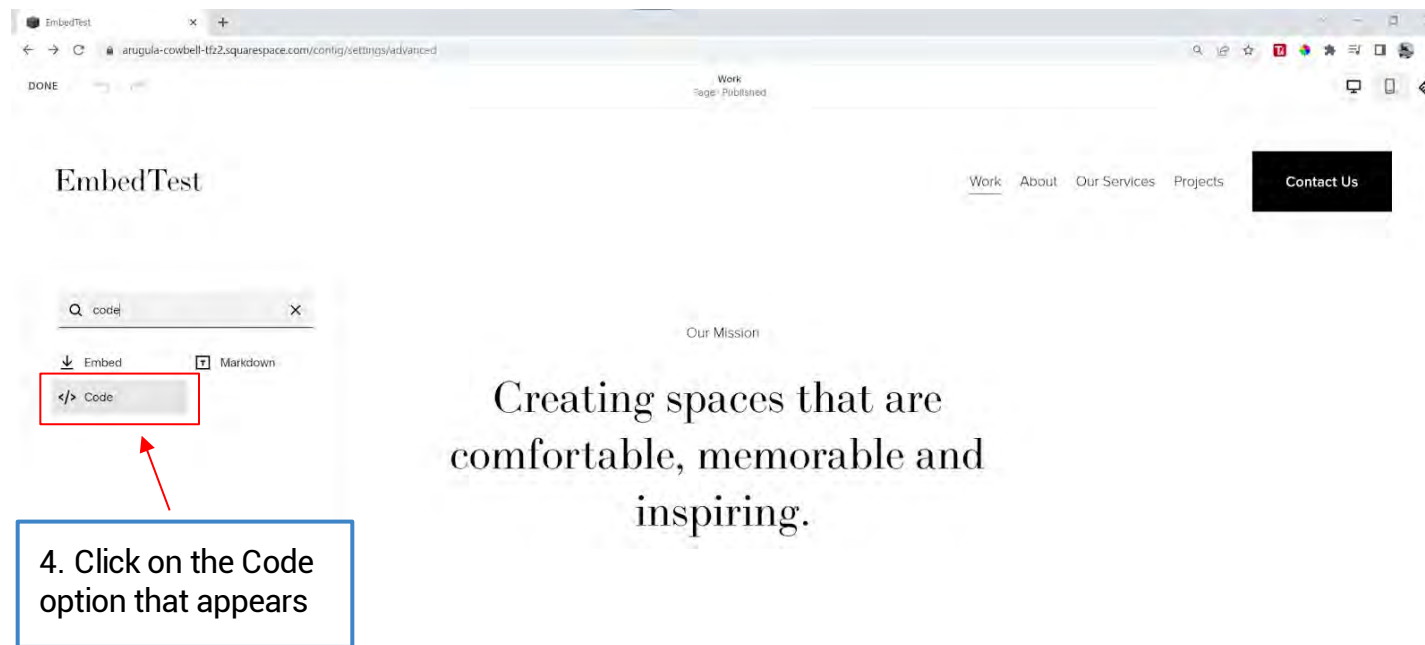

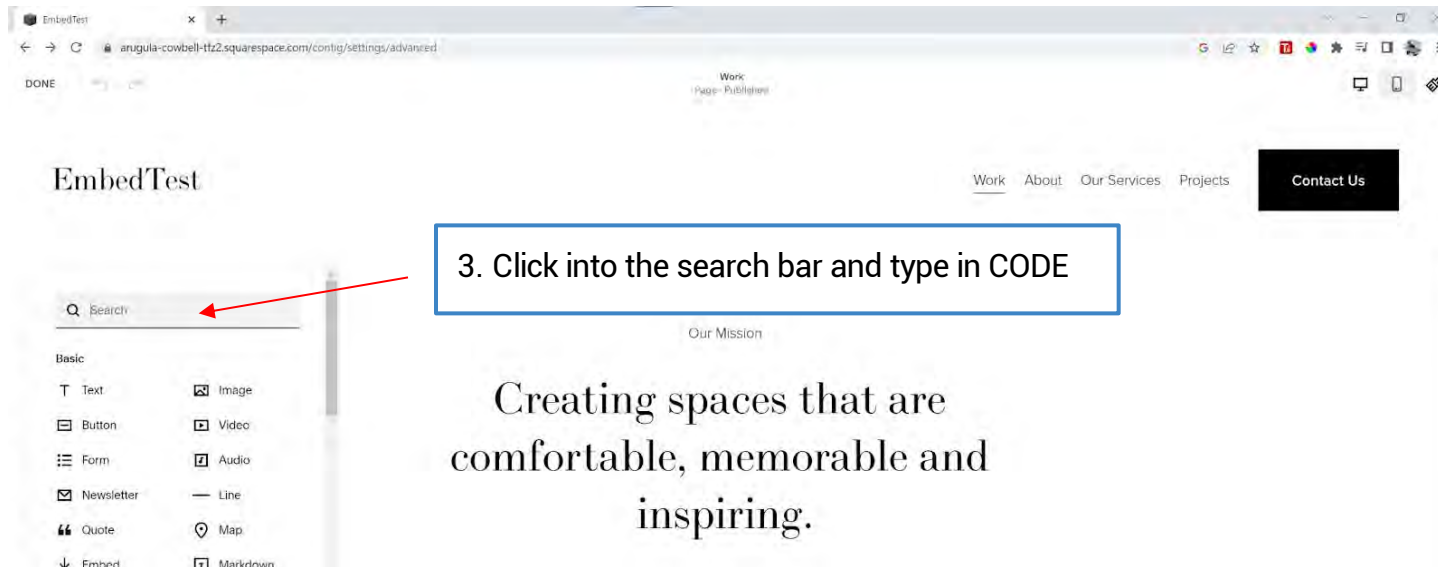

# SQUARESPACE

The image consists of two screenshots from the Squarespace website editor. The top screenshot shows the 'Advanced' settings sidebar on the left with options like 'External API Keys', 'Developer API Keys', 'Code Injection', 'URL Mappings', and 'Import / Export'. The main content area displays the 'EmbedTest' page. A red box highlights the 'EDIT' button in the top right corner of the page, with a red arrow pointing to it. A blue box contains the text: '1. Click EDIT on your Squarespace website'. The bottom screenshot shows the same 'EmbedTest' page in edit mode. A blue box highlights the main content area. A red box highlights the '+ ADD BLOCK' button in the top left corner of this area, with a red arrow pointing to it. A blue box contains the text: '2. Hover over the section of your site where you want to embed the mosaic. Click on + ADD BLOCK that appears in the top left of the section.' A floating menu on the right side of the content area shows options: 'EDIT SECTION', 'COPY', 'HEART', 'DOWN ARROW', and 'REMOVE'.

1. Click EDIT on your Squarespace website

2. Hover over the section of your site where you want to embed the mosaic. Click on + ADD BLOCK that appears in the top left of the section.
